

# Solar Gard® Architectural Window Film

Solar Gard window films provide a wide range of benefits to meet your needs.

## Heat and comfort

Whether it's a corner office or tables by an expansive window, keep every area of your building a consistent and comfortable temperature.

## Energy consumption

Solar Gard window films are a cost-effective retrofit solution that's easy to install and proven to reduce energy costs by up to 30%.

## Reduce carbon emissions

Reduce greenhouse gas emissions and your building's carbon footprint for less money than new windows.

## Safety and security

Gain protection against break-ins, vandalism and theft without blocking views or changing your building's external appearance.

## Glare

Enjoy your views without having to use blinds to block excessive glare.

## Fade control

Block 99% of UV light, the primary cause of interior fading.

## Protect your skin

Solar Gard films provide a Sun Protection Factor of 285+ to help protect from harmful UVA and UVB rays associated with skin cancer and premature aging.

## Appearance

Choose from a wide array of tints and colors, from optically clear to fully reflective, which allows you to change the appearance of your buildings as much or as little as you like.

## Privacy

Protect your occupants from onlookers and passers-by with a reflective film that blocks views into your building.

## Solar Gard architectural product line

Solar Gard offers a broad line of products to address your needs.

### Stainless Steel

Provides extraordinary solar control with a subtle grey finish from the outside.

### Quantum®

Offers superior heat protection through a patented technology.

### Solar Bronze

Features a subtle exterior copper finish that naturally complements most buildings and landscapes.

### TrueVue™

Provides superior views day or night, with low reflectivity, along with superior heat control and glare reduction.

### Aluminum

Offers optimum privacy while yielding significant energy consumption reduction.

### Low Emissivity Summer/Winter

Protects from solar heat in the summer and also keeps heat inside during the winter.

#### Sentinel™ Outside Weatherable

Provides superior heat and glare control on the exterior of windows where interior installation is not practical.

#### Decorative

Designed for privacy, with clear, frost, black opaque, white opaque and decorative vinyl options.

#### Graffittigard

A clear protective barrier, designed to be easily replaced, that protects painted and glass surfaces from permanent damage caused by vandals.

#### Armorcoat®

Safety and security film designed to retain broken glass shards to protect assets, reduce injuries and improve overall building safety.
